

## Products and Pricing

### Petrochemicals

#### PETROCHEMICALS

The Petrochemical Business Division's product portfolio includes the following:

##### Ethylene

Derivatives are mainly such as: low density polyethylene (LLDPE), high density polyethylene (HDPE), vinyl chloride (VCM), vinyl acetate (VAM), ethylene glycol (EG), styrene (SM) and acetaldehyde.

##### Propylene

The main derivatives are such as: acrylonitrile (AN), acrylic acid ester (Acrylates), epoxy resin (for adhesives), isopropanol (IPA) and polypropylene glycol.

## Butadiene

The main derivatives are polybutadiene rubber (BR), ABS, SBR and similar..

## Benzene

The alkyl aromatics plant effects transformation of this chemical product into its main derivatives of styrene (SM) and isopropylbenzene (cumene).

## Para-Xylene

Main derivative is polyethylene terephthalate (PET), used in the manufacture of plastic bottles and similar packaging products.

## Ortho-xylene

Main derivative is phthalate anhydride (PA), a raw material used in plasticizers.
